Do you own property in Barbados and dream of having it renovated for personal use or as rental income? Have you ever tried to hire contractors in Barbados?

Then you may know something about the challenges of coordinating a long-distance project: communication glitches, material purchasing problems, contract payment issues and a general feeling of insecurity about the entire experience.

To address all these issues, we are excited to introduce you to our company—BIMSHA RENOVATION & DESIGN—a new endeavor catering to Barbadian expats, wherever they may be.

We intend to make renovating your property seamless, with just one phone call, text, or email from you to get started.

Our “pay-per-task” operating method is designed to reduce risk to you. Each stage of construction is paid for separately. This approach gives you an elevated level of control and protection regarding your construction project.

Each project is divided into several stages. You start and stop the stages based on your financial desire or ability to move forward and your satisfaction with the job being done.

Examples of Stages:

- Site Evaluation
- Demolition
- Debris Cleanup
- Interior & Exterior Design
- Plumbing & Electrical Work
- Masonry Work
- Kitchen & Bathroom Cabinet Installation Countertop Installation
- Shower Plastering
- Painting
- Landscape Design & Execution

When each stage is complete, you decide when it is financially feasible and comfortable for you to move forward. The control is in your hands. Let's get started together!

If you have any questions or comments, feel free to get in touch at bimsha@comcast.net or 1.978.375.9735 (WhatsApp: text/voice/video).
